Blue Cross/Blue Shield Grant Collaborative Practice Pilot Phase 2 Process

1. Define overall Patient population through data analysis
2. Interview Intervention PCPs
3. Apply criteria to Patient population to create Intervention sample

1. Randomize Intervention sample
2. PCPs prioritize patients in sample
3. PCP/team contacts Patient/Family to make referral to pilot

Patient/Family agrees to referral?

- NO

Family Support Specialist obtains consent?

- NO

- YES

1. Family Support Specialist gets release
2. Family Support Specialist does family baseline interview

Any concerns?

- NO

- YES

Return to usual care

PCP follow-up call/visit

Re-refer if concerns remain
Notes:
1. Phase 1 data analysis includes preparation and dissemination of an Issue Brief on service utilization and expense trends for children with mental health and substance use needs.
2. PCP/team indicates a combination of the Pediatrician, nurses, medical assistants, and clinic social workers.
3. The Pedi-CMH team is the collaborative pediatric/child mental health (child psychiatry and family support specialist) team.
