

Receive Recognition

for your Sustainable Food Policies

Many cities and towns throughout California and the United States are adopting policies that support sustainable food systems. The following recognition programs help cities and organizations support and learn from one another:

- Michelle Obama's *Let's Move! Cities and Towns Campaign* encourages officials to take action to reduce childhood obesity. Learn more at www.letsmove.gov.
- *The Healthy Eating Active Living Cities Campaign* by the California Center for Public Health Advocacy offers assistance, training, and publicity to California cities working on policies that improve their food and physical activity environments. Visit www.healcitiescampaign.org.

The San Mateo County Food System Alliance would like to thank the San Mateo County Health System, Ag Innovations Network, and all members and allies of the Alliance who contributed their time and expertise to develop this brief.

The San Mateo County Food System Alliance (FSA) is a collaborative of farmers, fishermen, farmers' market managers, environmental advocates, public health professionals, and residents seeking to support and promote a healthier and more vibrant local food economy. For more information, please visit <http://aginnovations.org/alliances/sanmateo>.

¹ The San Mateo County Food System Alliance (FSA) defines local as value-added products, produce, and seafood that are grown or harvested in the county.

Producing, Distributing & Consuming Healthy Local Food

Ingredients for a Sustainable Food System

A sustainable food system ensures equal access to healthy, local¹ food and is economically viable, environmentally sound, and socially just.² In this type of food system³, farmers, fishermen and chefs profit from the sale of their produce, fish, and value-added products;⁴ all residents can access and afford to buy local, healthy food, and our land is not just maintained, but preserved for future generations.

Why Does a Sustainable Food System Matter?

San Mateo County's agricultural production in 2010 and local seafood harvest in 2009 had a combined worth of \$147 million. The actual impact of food production on the local economy is estimated to be much higher—as much as \$513 million—due to a multiplier effect.^{5,6} Our residents do not consume most of this food because it is purchased by food brokers and distributed outside of San Mateo County. Though this system works well for many farmers, it has decreased the variety of food grown in the county; reduced access to local, fresh and healthy foods, and distanced farmers from the local community.

A sustainable food system:

- Promotes the health of our residents by increasing access to healthy foods
- Benefits the environment by preserving agricultural land and working waterfronts
- Reduces our carbon footprint
- Enhances the economic vitality of our community by creating jobs
- Keeps money circulating within the community by boosting our local restaurant and tourism industries⁷

California Senate Bill 375 and Assembly Bill 32, which mandate planning and land use to reduce carbon emissions, contribute to a sustainable food system.

Actions to Support a Sustainable Food System in Your Community

The San Mateo County Food System Alliance can help you build a sustainable food system. You can find resources at <http://aginnovations.org/alliances/sanmateo>, or contact the San Mateo County Health System's Health Policy & Planning division at (650) 573-2398 or hpp@smcgov.org.

There are many ways your city or jurisdiction can join the movement:

Update Land Use & Other Local Policies

San Francisco

San Francisco City & County revised its urban agriculture zoning policies to identify lots which could be used for community gardens.⁹

1 Support Urban Agriculture and Community Gardens

- Establish urban agriculture as an approved land use in residential, multi-family, open space and other zones.
- Encourage residents to donate surplus backyard produce to the food bank and other non-profit organizations.⁸
- Promote school gardens and garden-based education in our schools.

Neighborhoods often have parcels of land that are ideal for community gardens but are unused or unavailable due to zoning restrictions. Changing zoning rules can increase access to fresh produce and bring communities together.

Redwood City

Redwood City recently began to celebrate an annual "Port Fest" to help residents learn more about the city's working waterfront.¹⁰

2 Protect Agricultural Land and Working Waterfronts

- Encourage strategies that protect working landscapes and waterfronts, such as easements, reduced tax burdens, and increased access to land and infrastructure.

Fishermen often struggle to access the space they need to operate their businesses due to tourism and residential and industrial uses that can overtake waterfronts. New farmers also struggle to establish their businesses. Investing in infrastructure for farmland and fisheries can contribute to the future food security of your community.

Sonoma

Sonoma County has preserved more than 70,000 acres of agricultural land and open space by creating an Agricultural Preservation and Open Space District that is funded by a quarter-cent sales tax.¹¹

Purchase and Promote Locally Grown, Harvested & Produced Food

3 Bring the *As Fresh As It Gets* Campaign to Your Community

- Encourage local businesses, including restaurants, grocery stores, catering businesses, and corner stores to use locally grown or harvested produce and seafood. For information on restaurants that sell local produce, visit www.freshasitgets.com.

San Mateo County

The *As Fresh as it Gets* campaign was created in San Mateo County to increase the purchase of locally grown or harvested produce and seafood.¹²

4 Adopt Local Food Purchasing Policies

- Require a percentage of food purchased to be grown locally.
- Create incentives for contractors who prepare food made with local ingredients.

Local food purchasing policies create demand for local food. Guidelines can be added to current policies that address purchasing and describe nutritional guidelines for meals and snacks provided by an organization.

Albany County, New York

Albany County requires at least 10% of the county's food purchasing costs for Residential Healthcare and Correctional Facilities to be spent on locally produced food.¹³

5 Participate in Community-Supported Agriculture and Fishing Programs

- Connect local producers with residents by increasing participation in Community-Supported Agriculture (CSA) or Community-Supported Fishery (CSF) programs.

CSA and CSF members pay a monthly fee for a regular box of produce or fish. This provides a reliable source of income for farmers or fishermen, keeps money in the community and decreases carbon emissions from transporting food long distances.

Half Moon Bay

The Half Moon Bay Fishermen's Association Community-Supported Fishery is the first CSF in Northern California.¹⁴

6 Support Healthy Mobile Food Vending

- Offer incentives to run a healthy mobile food business such as discounts on permit fees, reserved spots at preferred locations, or low-interest loans to purchase equipment for healthy mobile food businesses.¹⁵

In many communities, mobile food vending is an important part of the local economy and a convenient way for residents to purchase food. Healthy mobile food vending policies support small businesses and increase the amount of healthy food available in neighborhoods.

Kansas City, Missouri

Food vendors with a 50% healthy inventory got a 50% discount on their vending permits, and vendors with a 75% healthy inventory received special roaming permits that enabled them to sell at special roaming locations.¹⁶
