

Applying Social Determinants of Health Indicator Data for Advancing Health Equity

A GUIDE FOR LOCAL HEALTH DEPARTMENT EPIDEMIOLOGISTS AND
PUBLIC HEALTH PROFESSIONALS

BARHII is developing a new resource guide for local health department epidemiologists and public health professionals scheduled for release in spring 2014. The purpose of this step-by-step technical guide is to assist in the collection, analysis, and usage of 15 priority living conditions data indicators to be used by health departments and their community partners for local community assessments, program development, and policy advocacy with a health equity perspective. Included in the guide are concrete examples of public health strategies that use data from social determinants to address health inequities and to create healthier communities.
